If you are a student with a disability that affects your education, the Disability and Educational Support Program (DESP) can assist you in achieving your educational goals. We provide a variety of services and specialized courses designed to insure access to all campus programs, services, and facilities, and to facilitate maximum student independence and success.

If you are requesting services, you will need to meet eligibility criteria. A physical, mental, learning, or sensory disability that qualifies for academic accommodations under the law must be verified by a credentialed, certified, or licensed professional. A counselor or program specialist will guide you through the intake and verification process.

**Support Services**
- Academic Accommodations
- Computer Lab and Alternate Media
- Learning Disability Assessment
- Learning Disability Courses
- Learning Disability Support Labs
- Specialized Counseling
